

With this book, get answers to typical ABAP development problems or tasks: persistence programming, interface programming, security and tracing techniques, etc. The complexity of the recipes ranges from the simple starter plates to the complex main courses and some sweet deserts, of course! Each chapter is a short tutorial in itself, all organized and consolidated into an easy-to-read format. Many code samples, screenshots, and different icons will help you to follow the best practices provided. Enjoy your ABAP meal! \* Find answers to common and complex programming problems in various tutorials \* Learn the classic and modern techniques for developing solutions in ABAP \* Explore detailed code samples throughout the book Best Practices Learn best practices for programming and the solutions to both simple and complex programming problems. Programming Techniques Discover various techniques for dynamic, database, transactional, persistence, interface, and security programming in ABAP. Comprehensive Approach to Problem Solving Explore the context of a problem, solution alternatives, and the thought process involved in the development of a solution. Examples and Source Code Explore coding examples in every chapter, as well as two source code bundles that you can install on your local AS ABAP system. \* String processing techniques \* Dynamic and reflective programming \* ABAP and Unicode \* Database programming \* Transactional programming \* XML processing in ABAP \* Web services and programming with the ICF \* Email programming \* Security programming \* Logging and tracing \* Interprocess communication \* Parallel and distributed processing with RFCs

Camille: The Lady of the Camellias (Signet classics), Perraults Popular Tales, Reynold De Burgh: The Dark Knight 1 (Harlequin comics), Daredevil (1998-2011) #14, Knives 2000, Chamberss Edinburgh Journal, Volume 1,
