

This 2-hour video from author/presenter John Batdorff will cover all the features and benefits of creating and using Lightroom presets from installing and using existing presets, to creating presets from scratch, to backing up and sharing your presets. John will walk the learner through how to build presets and how he uses them as a professional photographer to achieve quality images to create a consistent look or speed up the processing of batch images. The presenter will also offer some of his downloadable Lightroom presets for viewers to experiment with and use. The video is wrapped in a unique interface that allows you to jump to any topic and also bookmark individual sections for later review. The unique “Watch and Work” mode shrinks the video into a small window to allow you to work alongside in Lightroom as you view the video. Project files used in the lessons are included on the disc so you can practice what you’ve learned. At the end of every lesson, you can test your knowledge by taking interactive quizzes. Duration: 2 HR User Level:

Intermediate/Advanced Closed-Captioning in English System Requirements: Mac OS X 10.6, Microsoft Windows XP, or higher 1 GHz processor or higher 4 GB RAM or higher 1 GB free HD space (does not include lesson files) Please Note: • This DVD-ROM can be viewed on your computer, but it will NOT play in a DVD movie player. • The course uses pop-ups; please enable them in your browser. For more information on how to enable Pop-ups please see our Learn By Video FAQ page at <http://www.peachpit.com/LBVFAQ>
