

The Conscious Parent: Transforming Ourselves, Empowering Our Children

Instead of being merely the receiver of the parents psychological and spiritual legacy, children function as ushers of the parents development. Parents unwittingly pass on an inheritance of psychological pain and emotional shallowness. To handle the behavior that results, traditional books on parenting abound with clever techniques for control and quick fixes for dysfunction. In Dr. Shefali Tsabarys conscious approach to parenting, however, children serve as mirrors of their parents forgotten self. Those willing to look in the mirror have an opportunity to establish a relationship with their own inner state of wholeness. Once they find their way back to their essence, parents enter into communion with their children, shifting away from the traditional parent-to-child know it all approach and more towards a mutual parent-with-child relationship. The pillars of the parental ego crumble as the parents awaken to the ability of their children to transport them into a state of presence.
